

# Week 33 Homework

Name  American egg

(Underline where you found your answers in the text)

## How Jobs Change

Long ago, most people worked with their hands. Many families were farmers. They grew their own food and took care of animals. There were no tractors, so they used horses to pull heavy tools. Other people were blacksmiths who made horseshoes and tools out of hot metal. People traveled slowly by walking or using wagons.

Today, many jobs are different because of technology. Most people do not work on farms anymore. Instead of using horses, farmers use big machines with computers inside. Many people now work in offices using computers to send emails and solve problems. We also have new jobs that did not exist a long time ago, like pilots who fly planes or people who fix robots! Even though jobs have changed, one thing stays the same: people still work hard to help their communities.

### Comprehension Questions: Underline where you found your answers in the text

1. Level 1 (Gathering): According to the text, what did farmers use to pull heavy tools before they had tractors?

- A) Robots
- B) Horses
- C) Trucks
- D) Planes
